TRAFFIC MEMO – CITY OF ROME

Starting on Tuesday, November 10, 2020, the intersection of North George Street and West Liberty Street overhead traffic control device will be temporarily replaced with four-way STOP signs to allow for the installation of new a state of the art traffic control system at this intersection. The installation is part of the \$319,000 N. George Street West Liberty Street intersection Improvement Project sponsored by the City of Rome. Central Paving Inc. of Frankfort NY will be removing the existing traffic control lights to make room for the installation of the new poles and new overhead traffic control devices. The new features will include new audible enabled pedestrian control along with new traffic pattern controls. The intersection has been reconfigured to eliminate the westbound slip ramp to Liberty Street which will allow a new bus lane to be created to enhance the recently opened Centro operated Liberty Street Bus Shelter. The project is scheduled to be completed on or around December 11,2020.
